Austin, Texas, 78705
United States of America

Dr. Grogga is an econometrician and economic consultant at Applied Economics Consulting Group, Inc. (“AECGI”), specializing in the quantification and rebuttal of economic and financial damages in commercial litigation and arbitration. His work focuses on matters involving financial securities, the oil and gas sector, and intellectual property, where he applies econometric modeling, valuation, and quantitative analysis to assess alleged economic damages and test opposing expert opinions. Dr. Grogga leads the development of damages analyses, critiques opposing expert methodologies, and supports the preparation of expert reports and testimony in state and federal courts. Working alongside testifying experts and counsel throughout the litigation lifecycle, he assists in real time during depositions and cross-examinations of opposing experts, helping shape lines of questioning. His work has helped reduce claimed damages, support Daubert challenges, and inform settlement strategy.
